📍 Tehran, Iran

Resume Summary

I hold a Bachelor's degree in Computer Science, which has provided me with a strong foundation in computer science concepts and programming. This background has helped me develop a solid understanding of algorithms and data structures.

I am deeply interested in the field of Data Science, with a particular focus on Machine Learning and Deep Learning and Agent development.

In the area of Machine Learning, I have implemented end-to-end projects — from data preprocessing and feature engineering to model development and deployment as web applications using Streamlit.

In the area of Deep Learning, I have worked with neural network architectures such as Feedforward and Transformer models, particularly for Natural Language Processing (NLP) tasks. I have hands-on experience in fine-tuning pretrained models on Hugging Face (e.g., BERT) and am familiar with the complete training and evaluation pipeline for these models.

I am proficient in using libraries such as NumPy, Pandas, Matplotlib/Seaborn, Scikit-learn, Transformers, and TensorFlow, and I am comfortable working with development tools like Jupyter Notebook, Google Colab, and VS Code.

Skills

python

Django

Linux

Machine Learning

Natural Language Processing

Deep Learning

Transformers

RegEx

Prompt Engineering

SQLite

git

Grafana

Education

Master of Computer Science

Branch: Systems Theory

Institute/University: Allameh Tabataba'i University

Tehran, Iran

October 2025 - Present

Bachelor of Computer Science

Institute/University: University of Kashan

Kashan, Isfahan, Iran

October 2020 - September 2025

GPA: 15.04

Diploma in Mathematics and Physics

Tehran, Iran

GPA: 18.50

Projects

Customer Churn Classification Project

This project predicts whether a bank customer is likely to churn (leave the bank) based on personal and account data. I approached the problem using both classical ML models and a neural network (ANN), while optimizing performance and usability.

Teaching

Mathematics Teaching

2019

Private mathematics tutoring for students at various levels and enhancing problem-solving skills

Honors

I won a bronze medal in the IMC Mathematics House competition

Work Experience

Developer

MBS Co.

Tehran, Iran

November 2025 - Present

LangChain

n8n
